

1 ABSTRACT OF THE DISCLOSURE

2 A roasting hood for a barbecue, the roasting hood being locatable over a
3 cooking area of the barbecue, the roasting hood including an inner surface
4 covered with a catalytic coating, wherein when the barbeque is in use with the
5 roasting hood located thereon, at least the inner surface of the roasting hood is
6 heated such that any food splatter, grease, juices, fats and so on projected onto
7 said inner surface are at least substantially burnt off from the catalytic coating
8 covering the inner surface of the roasting hood.
